

ADITYA CANDRA GUMILANG

West Jakarta | adityacandragum@gmail.com | [LinkedIn](#) | [Portfolio](#)

Summary

Data Engineer with hands-on experience in building **AI-powered analytics systems**, CDC-based **data warehouses**, and **automation** pipelines. Proven impact in **reducing query latency**, **automating data marts**, and developing an **AI-based Quality Control system** using **computer vision**. Strong background in **ML**, **NLP**, and **computer vision** for production use cases.

Education

Universitas Bina Sarana Informatika

2021 – 2025

Informatika – current GPA 3.97/4.00

Thesis: Performance Evaluation of BM25 and FAISS in a LANGCHAIN-Based Augmented Generation (RAG) Retrieval System.

Experience

Data Engineer – Full Time

June 2025 – Present

PT Porto Indonesia Sejahtera

- Developed and deployed an **AI agent** that translates **natural language** into **SQL** queries, reducing support tickets and enabling users to query data independently.
- Implemented pg_cron to **automate** data mart refresh every hour, **cutting processing time** by over **75%** and improving data readiness.
- Led an initiative to explore and built **Data Warehouse** by implementing **CDC replication** from **PostgreSQL** to **BigQuery**, enabling faster OLAP processing by reducing query execution time from 145 seconds to 1 second.
- Built an automated **Datastream** incident mitigation service using **Flask** on **Google Cloud Run**, triggered by **Cloud Monitoring** alerts, with real-time, **BigQuery** audit logging, and notifications.
- Led an Initiative to explore **AI-based Quality Control automation system** using **computer vision** to detect product size, shape, and color in real-time, improving inspection accuracy and production efficiency.

Data Management - Internship

September 2024 – Desember 2024

PT Telkom Indonesia

- Designing and implementing a **web-based data collection platform** for investigating customer issues, simplifying the process of gathering, analyzing, and resolving operational challenges.
- Designed and implemented a robust **push notification system** to enhance data quality and consistency across the organization, leading to increase in user engagement.
- Creating a **browser extension for automated web scraping**, enabling seamless data extraction across multiple websites, further enhancing the flexibility and scalability of data collection efforts.
- Developed and implemented **web scraping solutions** using selenium to automate the extraction of 312,000 records, significantly streamlining data processes and enhancing data accuracy.

Machine Learning Engineer - Internship

May 2024 – June 2024

PT Bukit Vista Nusantara

- Conducted comprehensive **feature engineering** for property clustering analysis.
- Developed a **geo-clustering** model utilizing unsupervised learning algorithms to categorize properties into 10 distinct clusters, facilitating targeted marketing strategies.

- Designed and implemented a **recommendation system** using Euclidean distance calculations to suggest similar properties to potential customers, improving user satisfaction and engagement.

Achievement

Top 20 of Data Science Competition 2023 [certificate]	September 2023
National Issued by: StarCore Analytics	
1st Winner of IT Bootcamp: Software Development & Network Security [certificate]	July 2023
Regional Issued by: Universitas Bina Sarana Informatika	
3rd Winner of PIKMI: Software Development Competition 2023 [certificate]	June 2023
National Issued by: Univesitas Bina Sarana Informatika	

Technical Skills

Programming: Python, SQL, PHP, JavaScript, Java, Dart.

Machine Learning: Scikit-Learn, TensorFlow, Pytorch, Deep Learning, NLP, Feature Engineering, ETL.

Software & Tools: Google Colab, Jupyter Notebook, Tableau, Excel, Github, Docker.

Licenses & Certificates

- BNSP Certified Program Analyst** [\[certificate\]](#) (August 2024 – August 2027)
- MikroTik Certified Network Associate (MTCNA)** [\[certificate\]](#) (November 2023 – November 2026)
- Cisco CCNA 1 Certified** [\[certificate\]](#) (January 2023)

Projects & Portfolio

- Yu Food: Your Food Rescue App** – Developed a **prototype** application for a competition, aimed at reducing food waste and lowering carbon emissions by redistributing surplus food at affordable prices. Built using **Flutter & Firebase** to demonstrate feasibility and potential impact. [\[link\]](#)
- Similar Property Clustering** – Developed a property **clustering & recommendation system** using **unsupervised learning & ensemble techniques** to assist marketing teams in identifying similar properties for better-targeted promotions and customer engagement. [\[link\]](#)
- Customer Segmentation** – Applied **K-Means** to segment Brazilian e-commerce customers for targeted marketing. [\[link\]](#)

Courses

TensorFlow Developer Specialization [certificate]	May 2024
Issued by: DeepLearning.AI	
Machine Learning Specialization [certificate]	May 2024
Issued by: Stanford University Online	
Mathematics for Machine Learning and Data Science [certificate]	May 2024
Issued by: DeepLearning.AI	
Analyze Data to Answer Questions [certificate]	May 2024
Issued by: Google	
Basics Structured Query Language (SQL) [certificate]	October 2023
Issued by: Dicoding Indonesia	

Languages

- Indonesian** (Native)
- English** (Profesional Proficiency, TOEFL ITP Institutional Prediction: **557** – [\[certificate\]](#))
